

Are you up to the Challenge?

The CUNY Math Challenge

There's Strength in Numbers

Regardless of your major, if you are a matriculated CUNY undergraduate student and enjoy math problems, the CUNY Math Challenge is for you!

\$2,500 Grand Prize

Sponsored by the Office of Academic Affairs and the CUNY Institute for Software Design and Development (CISDD) and supported by the Office of the Chancellor, the CUNY Math Challenge seeks to identify and reward CUNY's best math talent. Students are invited to compete for cash prizes ranging from \$100 up to a grand prize of \$2,500. Winners of the second round will receive \$100, and in the final round, \$500 to a grand prize of \$2,500.

How it Works

The first step is to register **now** to prepare for the first online round. You must register by February 18, 2015. The questions for this round will be posted on Monday, February 9th, and will be open until Sunday, February 22, 2015. Problems range in difficulty from the "not easy" to "pretty tough." No knowledge of "advanced mathematics" is needed.

Students with the best scores in this round will be invited to an in-person round on Sunday, March 15th. There will be a winner from each college; one student with the best score in their college will be awarded \$100. The third round will be on-line and will be open for three weeks. Students with the highest total points after the first three rounds will be invited to the final round, an in-person exam to be administered on Sunday, April 26, 2015. Approximately 30 qualifying students will compete in the final round for the cash prizes. Winners will be publicly recognized at an event in early May.
