

# Math 113: Probability and Statistics

## Spring 2011

**Instructor:** Prof. Marcello Lucia

**Office:** 1S-224

**Email:** marcello.lucia@csi.cuny.edu

**Office hours:** M 3:30-4:30pm, M 8:00pm-9:00pm, W 3:30-4:30pm

The goals of my classes are LEARNING, expending knowledge, develop intellectual skills. This is done by WORKING, asking questions, in a quiet environment where students contribute actively to reach these goals.

To enhance academic work and create a quiet environment where everybody can grow in our learning community, the following conduct is requested during the class:

- (1) The classroom is not the right place to express your complains or frustrations.
- (2) Chatting on your cellphone during the class are unnecessary distractions. Therefore cell phones, ipods, headphones, etc are not permitted in the classroom.
- (3) When class has started, you must focus on the lesson.
- (4) Interrupting the class with requests that are not related to the topic of the class is slowing down the class.
- (5) It is very difficult to stay focus 100minutes. But it is part of the intellectual challenge of this class. Concentration is fundamental in any learning process. So arrive in time and do not leave the room before the end, unless strictly necessary.

This code is for adult person, and person that are eager to LEARN.

If you have any complaints, use my office hours, and not the class time to formulate your complains.

Your questions are welcome. If a question needs to be explained in more details, we can discuss after class, during office hours or email me to find a suitable time to discuss of mathematics.

## **GRADE POLICY**

First Test:	20%
Second Test:	10%
Third Test:	20%
Project:	10%
<b>Final:</b>	<b>40%</b>

## **ACADEMIC INTEGRITY, PLAGIARISM, CHEATING**

Please refer to: <http://www.csi.cuny.edu/catalog/undergraduate/index.htm>

Integrity is fundamental to the academic enterprise. It is violated by such acts as borrowing or purchasing assignments and other written assignments, using concealed notes or crib sheets during examinations, copying the work of others and submitting it as one's own, and misappropriating the knowledge of others. Violations of academic integrity may result in a lower grade or failure in a course and in disciplinary actions with penalties such as suspension or dismissal from the College.

In particular: Talking during an exam with your classmate, stealing information to solve problems in an exam is not tolerated. Remember the following:

HONESTY and ACADEMIC INTEGRITY.

You have the opportunity of learning a lot at CSI. However there are no secrets, you must WORK. Faculties can guide you in the learning process but YOU must do the work.

Growing intellectually and LEARNING are my main goals. I will be happy to have with you any intellectual debate or mathematical discussions. If you have complaints, bring it in a constructive way, and keep in mind that the main goal of this class is LEARNING.
