

Calculus Book/Software Guidelines

Summer, Fall 2022

Calculus instructors have an option of using Achieve or Webworks for their Calculus sections. The list of sections and homework systems used will be posted on the department website (url: <https://www.math.csi.cuny.edu/Courses/CalculusSoftwareOptions.html>). Here are guidelines for students.

1. **Instructors using Achieve:** Students are required to buy Achieve which comes with a homework system and an online book. Here are the available options to buy Achieve:

Achieve (1-term): \$ 76.99 (Bookstore ISBN: 9781319411657)

Achieve (4-term): \$ 108.99 (Bookstore ISBN: 9781319438333)

Loose-leaf + Achieve (1-term): \$ 120.99 (Bookstore ISBN: 9781319411671)

Loose-leaf + Achieve (4-term): \$ 143.99 (Bookstore ISBN: 9781319438357)

2. **Student Options:**

- (a) Students taking only one semester of Calculus are suggested to buy the 1-term access to Achieve.
- (b) Students planning on taking more than one semester of Calculus are suggested to buy the 4-term access to Achieve, irrespective of whether students will enroll in Achieve sections or Webwork section in subsequent semesters.

Note:

- (a) Access to the online book expires after Achieve subscription expires. If students want to have a hard copy of the book, students can choose the "Loose-leaf" option above.
- (b) Students planning on taking more than one semester of Calculus and enrolled in an Achieve section can use their online book if they enroll in a Calculus Webwork section in subsequent semesters.
- (c) Students who are taking more than one semester of Calculus, and who have bought a 1-term access to Achieve, may be able to extend their Achieve subscriptions to 4-term access by paying the difference. Please contact your instructor.

2. **Instructors using Webwork:** Since Webworks is free, students do not need to buy any homework system. However students are required to obtain the text book either through Achieve (as above) or a used book or rent a book.

Note: Students planning on taking more than one semester of Calculus and enrolled in a Webwork section may be required to buy Achieve if they enroll in a Calculus Achieve section in subsequent semesters.
