## Math 232 (Section 31486): Spring 2025 Syllabus

### Analytic Geometry and Calculus II (Honors)

Instructor: **Joseph Maher**

Office: 1S-222

Phone: (718) 982-3623

Email: joseph.maher@csi.cuny.edu

Office hours: M 2:30-3:20, W 12:20-1:10 (in 1S-214) W 1:25-2:15

Course location: MW 10:10-12:05, 1S-115

Textbook: Rogawski, *Calculus, Early Transcendentals*, ET edition, W.H. Freeman

Grading policy: 10% Homework and attendance

50% Midterms

40% Final

Additional info:

Disability policy: Qualified students with disabilities will be provided reasonable academic accommodations if determined eligible by the Office for Disability Services. Prior to granting disability accommodations in this course, the instructor must receive written verification of student's eligibility from the Office of Disability Services, which is located in 1P-101. It is the student's responsibility to initiate contact with the Office for Disability Services staff and to follow the established procedures for having the accommodation notice sent to the instructor.

Integrity policy: CUNY's Academic Integrity Policy is available online at <https://www.cuny.edu/about/administration/offices/legal-affairs/policies-reso>

## ROLE IN CURRICULUM

MTH 232 is the second course of a three-semester sequence in calculus.

## LEARNING GOALS AND ASSESSMENT PLAN

Learning Goal	Assessment
Find areas between curves and volumes of solids of revolution using definite integrals.	NA
Determine whether a given infinite series converges or diverges.	NA
Solve applied problems using calculus of vector-valued functions.	NA
	NA

When assessment activities are done, the results will be summarized in memorandum form and filed with the department chairperson for record keeping purposes.

Information obtained from assessment will be used to assess and self-reflect on the success of the course and to make any necessary changes to improve teaching and learning effectiveness.

## Undergraduate Catalog Course Description

### College of Staten Island

Course prefix:	MTH
Course number:	232
Course title:	Analytic Geometry and Calculus II
Subject	Mathematics
Minimum credits:	3
Maximum credits:	3
Hours per week:	4
Course description:	The second of a three-semester sequence in calculus. Topics include areas between curves, volumes of solids of revolution, techniques of integration, sequences and series, improper integrals, polar coordinates, and parametric representative of curves.
Prerequisite:	MTH 230 or MTH 231 MTH 229.
Comments:	MTH 229.
